

# EPS PACKAGING LCA

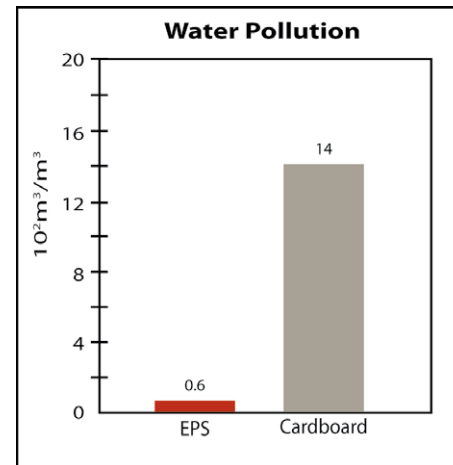

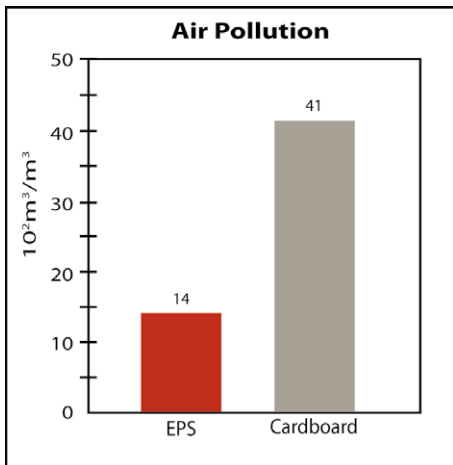

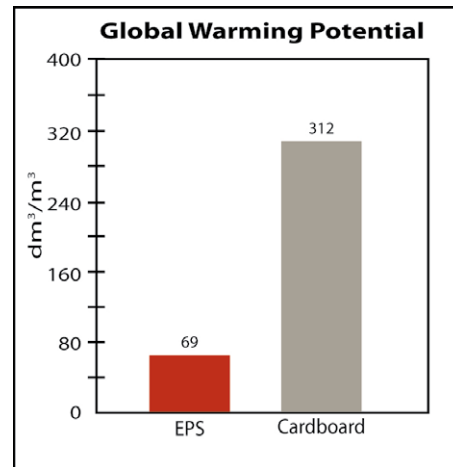

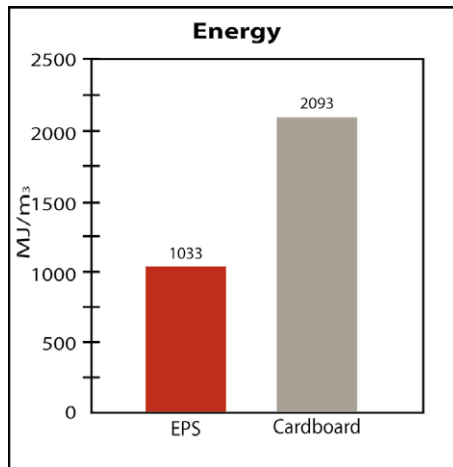

## Life Cycle Benefits.

When choosing Foam-Control EPS you are getting a material with built-in features that provide in environmental benefits over other protective packaging products.

## Life Cycle Analysis.

A life cycle analysis by InFo Kunststoff e.V. compared EPS to corrugated cardboard. The study quantified the energy use, global warming potential, air pollution, and water pollution associated with 1 cubic meter of EPS packaging or corrugated cardboard packaging.

## Results.

## Summary.

Results of the study clearly demonstrate the environmental benefits of EPS packaging when compared to corrugated cardboard packaging.
