All warranty information described in this document is general and does not include a full description of the warranty terms and conditions. Please consult the full warranty document associated with each individual Dryvit system. Information contained in this product sheet conforms to the standard detail recommendations and specifications for the installation of Dryvit Systems, Inc. products as of the date of publication of this document and is presented in good faith. Dryvit Systems, Inc. assumes no liability, expressed or implied, as to the architecture, engineering or workmanship of any project. To ensure that you are using the latest, most complete information, contact Dryvit Systems, Inc.

DS248

When One Plus One Equals Three

What do you get when two world leaders — Dryvit Systems, Inc. and Tremco Incorporated — combine forces to offer a warranty program designed to provide assurance and comfort to the building owner? Added value, reassurance and peace of mind.

These two international category leaders share a record of success and a reputation for manufacturing quality, high-performance products. The result: uncompromising financial strength and the quality assurance every building owner wants.

The Benefits

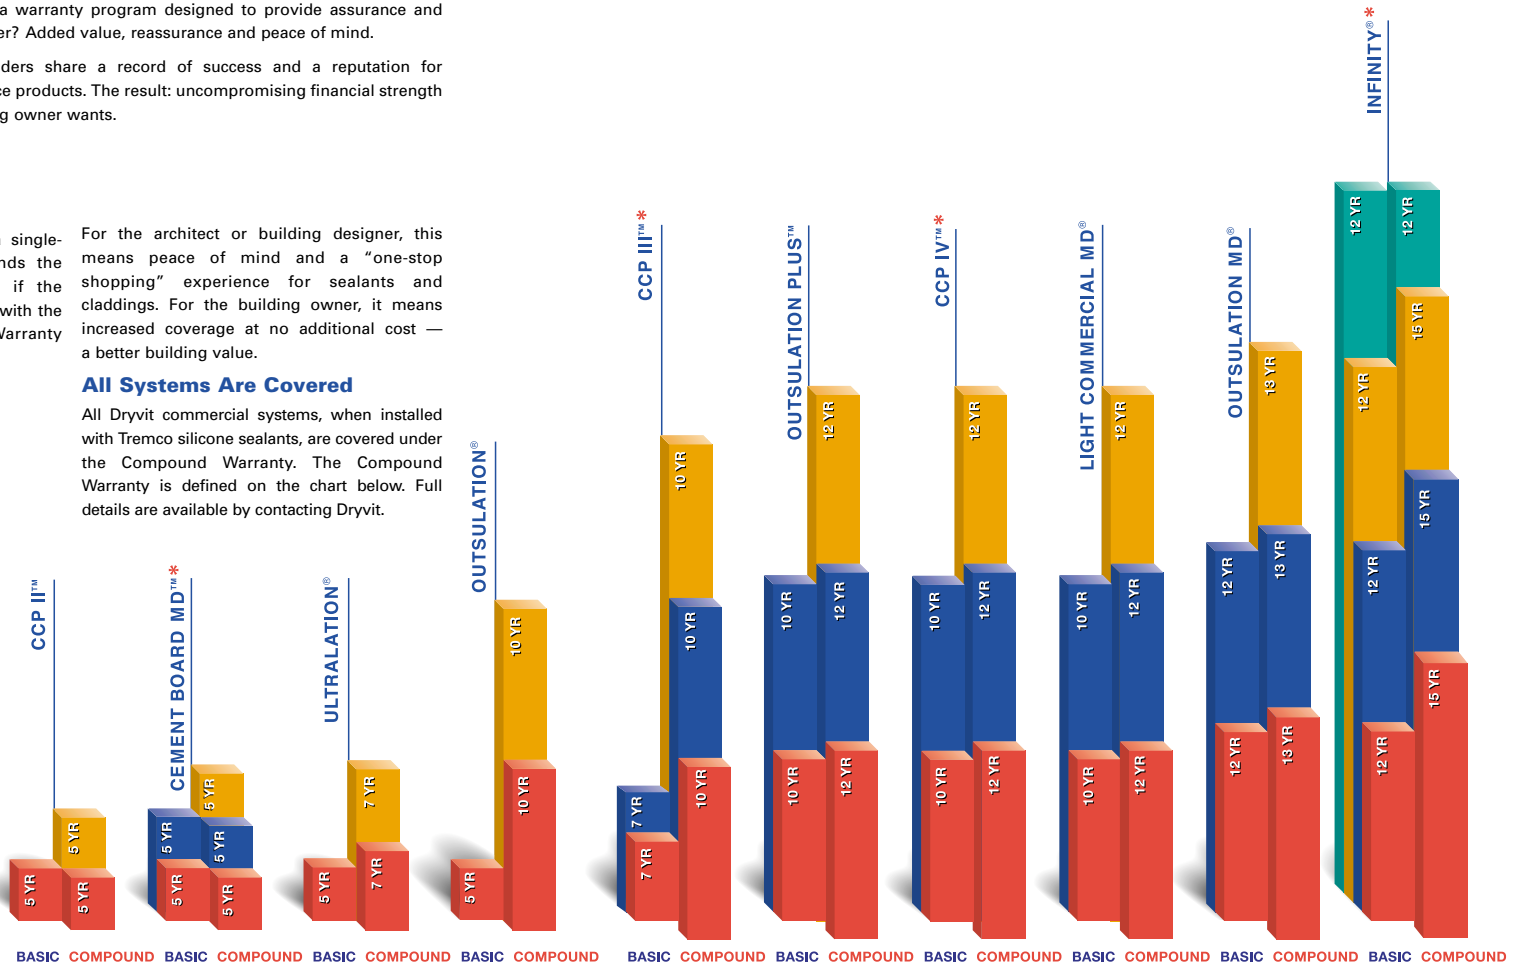

The Dryvit Compound Warranty is a single-source product warranty that extends the standard Dryvit system warranties if the building owner uses Tremco sealants with the Dryvit cladding. The Compound Warranty offers the following advantages:

- Compatibility between the cladding and sealants guaranteed
- Single source — one contact for dispute resolution
- Extended warranty periods

For the architect or building designer, this means peace of mind and a “one-stop shopping” experience for sealants and claddings. For the building owner, it means increased coverage at no additional cost — a better building value.

All Systems Are Covered

All Dryvit commercial systems, when installed with Tremco silicone sealants, are covered under the Compound Warranty. The Compound Warranty is defined on the chart below. Full details are available by contacting Dryvit.

- MATERIALS** > Dryvit-manufactured materials will be free of manufacturing defects, will not lose their bond, peel, flake or chip and further, the finish will be fade resistant except for specially produced colors.
- DRAINAGE** > Dryvit cladding system will effectively drain any moisture that should enter the wall cavity.

- SEALANTS** > Tremco Spectrem 1, 3 and 4 silicone sealants will be free from manufacturing defects and perform as a weathertight weather seal.
- SHEATHING** > Georgia-Pacific Dens-Glass® Gold sheathing will be free from manufacturing defects.

Basic Warranty covers only the Dryvit materials, while the Compound Warranty covers both the Dryvit and Tremco materials. Dens-Glass Gold is warranted only as part of the Infinity System.

*Third Party Inspection Required
